About the symposium

The symposium is carried out with support from the Jerring Foundation which supports research and activities for children with special needs.

The goal is to give the participants knowledge about:

- Violence against children and the consequences for the somatic and psychological health, ability to function and quality of life.
- Current strategies to apply systematic quality improvement science in healthcare to multidisciplinary and interagency settings.
- International examples.

Target groups

1. Professionals across the Nordic countries within healthcare, social workers, psychologists, child protection teams, child protective services, law enforcement and criminal justice, Barnahus, pediatrics.

2. Researchers, decision and policy makers, child advocacy.
